removed.txt

Brad,

Okay. We were only following what your letters indicated plus your prior statement that EPA did not want the Phase 1 report revised. Consequently, we have not even begun to prepare responses to the comments on the Phase 1 report, although per our conversations we did look at the comments to see which ones needed to be addressed in the Work Plan Addendum for Phase 1D and addressed those in the addendum accordingly.

I will contact Bridgeton Landfill about proceeding with development of responses to comments on the Phase 1 report. I assume that this is now the top priority, correct?

**Subject:** RE: Work Plan Addendum - Phase 1D Investigation

Paul,

I understand and appreciate being responsive to our letter regarding the IB Analysis and 30 day response. During prior technical discussions, I believe it was everyone's intent to get back out in the field in April and complete the RIM characterization if possible, which is from EPA's perspective the highest priority with regards to both the IB analysis and OU1 remedy amendment. This is because RIM characterization is from EPA's perspective the key to successfully completing both action items. Therefore, EPA needs to have a Phase 1D work plan amendment that is consistent with all agency comments and something that fully documents the parties' relevant comment responses. Without it, our reviewers can only evaluate what is provided and then restate that which is not. Naturally, we would work with you to expedite the process through follow up technical discussion once this document has been reviewed and

comment responses considered and/or submitted to ensure they are fully addressed in the final work plan submittal.

Let's discuss further tomorrow once Brian is back in the office, as my calendar is currently open for Tuesday. Please note that our team is reviewing the document this week with every intent of responding back by next week but would certainly prefer to coordinate with receiving your comment responses first to maximize efficiency and avoid duplication of efforts for either of us.

Thanks,

Bradley Vann - Remedial Project Manager

We are working on the responses to the comments on the IBAA since those came with a

deadline. I had a call schedule with Bridgeton Landfill this AM and was going to ask them how they wanted to proceed re: the Phase 1 comments but Brian is out sick and is looking to reschedule it for tomorrow. Once I talk with them I will call you and we can discuss the priorities.

Paul,

Document received and under review. I know you worked to get this one out the door. Question, when can we expect to see responses to our reviewers comments on the Phase 1 report?

Thanks,

**Subject:** Work Plan Addendum - Phase 1D Investigation

Brad,

On behalf of the West Lake OU-1 Respondents, we have prepared the attached addendum to the prior Phase 1 GCPT Investigation and Phase 1B/1C Soil Boring Investigation Work Plans prepared by Feezor Engineering, Inc. on behalf of Bridgeton Landfill, LLC that were previously approved by EPA. The attached addendum describes the scope and procedures to be used to perform additional characterization of the extent of RIM occurrences in the southwestern and western portions of Area 1 which we are terming the Phase 1D investigation.

Please be advised that the figure showing the locations of the prior and proposed additional borings is best printed on 11 x 17 paper.

Please let us know if you have any questions or desire any additional information with respect to the Phase 1D investigation or any other aspect of our work at the West Lake Landfill.

Thank-you and have a great weekend, Paul
